Control Chain 1

Generation 1.

Cheddar gorge is thought to be a rock formation formed by water floods at the end of the last ice age¹. Often the limestone would be blocked by ice, stopping water flowing through it² and forcing it to flow over the top, carving the gorge³. When the ice melted, water could flow through the bottom and the caves were formed⁴. Now, there is no river flowing through much of the gorge, apart from when a river emerges from underground.⁵

5/5

Generation 2.

Cheddar gorge is thought to be a rock formation that formed by water floods at the end of the last ice age¹. The limestone got blocked by ice² and the water was forced to flow over the top carving the gorge³. When the ice melted the water could flow through creating caves. Now there is not much water.

3/5

Generation 3.

Cheddar gorge is a rock formation formed during the last ice age. The ice blocked the limestone² and the water went round and carved. The ice melted and the water had to go round the gorge and make caves. No there is no water.

1/5

Control Chain 2

Generation 1.

Cheddar Gorge is rock formation made from the melt rivers at the end of the last ice age¹. The limestone was eroded when the rivers could not go past the ice and consequently gorges were carved out. In warmer periods, the ice melted and the water from the melt rivers could flow through, instead under water caves and tunnels were made.

1/5

Generation 2.

Cheddar Gorge is rock formed by melting at the end of the last ice age. Due to the ice, sediment was unable to pass and limestone was formed. When the ice melted, the rock could pass through but instead went through underground caves.

0/5

Generation 3.

Cheddar gorge is rock formed by melting at the end of the last ice age. Due to ice melting, sediment and limestone formed. The melting allowed rocks to pass through the surface.

0/5

Control Chain 3

Generation 1.

Cheddar Gorge is a rock formation that was formed from melting water at the end of the last ice age¹. During the ice age the limestone was filled with ice² and as a result the water had to flow over the top of the limestone carving out the gorge³. As the ice in the limestone began to melt water began to flow through the limestone forming underground rivers and creating the underground cave network⁴. Nowadays the gorge is dry until a river appears from out of the cave further down the gorge.⁵

5/5

Generation 2.

Cheddar Gorge is a rock formation that was formed by melting water at the end of the last ice age¹. During the ice age gaps in the limestone were filled with ice² so water had to flow over the top, carving out the gorge³. As the ice melted the water flowed down to form the underground rivers and underground cave network. Now there is no water in the gorge except at the end where it flows out from the cave.

3/5

Generation 3.

Cheddar gorge was formed during the last ice age. It was formed due to gaps in the limestone being filled by ice², therefore the water had to flow on top, carving out the gorge.³ Once the ice melted, the water was able to flow down forming an underground network of rivers and caves. Now, there is no water flowing in cheddar gorge.

Social Chain 1

Generation 1.

A boss of a small company took his attractive secretary out for a long lunch on his birthday¹ where they had some drinks. After the lunch the secretary asked her boss if he wanted to come up to her apartment for some more drinks² which he readily agreed to. When the secretary left the room to 'slip into something more comfortable'³, she returned with his birthday cake as well as his family, friends and wife⁴ to find that the boss was waiting wearing nothing more than his socks⁵.

5/5

Generation 2.

One day a boss took his attractive secretary out for a long lunch as it was his birthday and they had some drinks¹. After the meal the secretary asked her boss if he wanted to come up to her apartment for some more drinks², which he readily agreed to. When the secretary left to 'slip into something more comfortable'³ she returned with his birthday cake, friends, family and wife⁴ to find the boss waiting wearing nothing but his socks.⁵

5/5

Generation 3.

One day a boss took his good-looking secretary out for lunch. During the meal they had quite a few drinks. After, the secretary asked if he wanted to come back to her apartment. When they arrived, the secretary left to 'put something more comfortable on'³. When she came back, she arrived with a birthday cake, friends, family, and his wife⁴, whilst the man was stood there with nothing but his socks on⁵.

3/5

Social Chain 2

Generation 1.

A boss from a small company invited his attractive secretary out for lunch for his birthday¹. Afterwards she invited him back to her apartment for a drink² which he agreed to. She then said she was going to “slip into something more comfortable”,³ and when she returned, with a birthday cake, surrounded by the man’s friends, wife and children⁴, they found him wearing nothing but his socks⁵.

5/5

Generation 2.

A boss from a small company invited his attractive secretary out to lunch with him on the day of his birthday¹. After lunch, she invited him back to her apartment for a drink², which he agreed to. When they got there, she told him she was going to “slip into something more comfortable”, and left the room³. When she returned with a birthday cake for him, along with his wife, friends and children⁴, they found him in nothing but his socks.⁵

5/5

Generation 3.

A boss was invited his attractive secretary out for lunch with him as it was his birthday¹. After the lunch she invited him back to her apartment for a drink², which he agreed to. When they got to the apartment she said she just wanted to “slip into something more comfortable”³. She came back with a birthday cake, his wife, friends and children⁴ to find him in nothing but his socks⁵.

5/5

Social Chain 3

Generation 1.

A man went out and had drinks with his very attractive secretary, she then invited him up to her apartment², to which he readily agreed and then she said she was going to go and 'slip into something a little more comfortable'³, then she returned with a birthday cake and a surprise birthday party for the man, the guests included his friends, family and wife⁴. They found the man looking very surprised in nothing but his socks.⁵

4/5

Generation 2.

A man went out for drinks with his very attractive secretary. She then invited him back to her place². When they got back she said she was going to 'slip into something more comfortable'³. She returned with a birthday cake and a surprise party for the man. Amongst the guests were his friends, family and wife⁴. They were surprised to see him there in nothing but his socks⁵.

4/5

Generation 3.

A man went out for drinks with his secretary. When they returned to his house she asked him to 'slip into something more comfortable' while she left the room for a short while. She returned with a birthday cake. His friends and family⁴ were surprised to find him wearing nothing but his socks⁵.
